

Git and Github

Midterm: *Debate Club*

Assignment Description:

Work with ONE other person as a team, or alternatively work on your own with 2 github accounts (if you have them).

Create a Github repo with a ReadMe file; add your partner as a collaborator.

You will be building a 1-page app. Pick a subject that you can disagree about - both points of view should appear in the final submission. As an example, one person could argue that dogs are best, the other person could argue that in fact cats are WAY better than dogs.

Create a simple page with images and text. Divide the page into two sections, using the SECTION element. The first section is arguing FOR, the second is arguing AGAINST. Each team member will use one of the section elements to express their point of view.

Create a conflict with your teammate before you get too far into the assignment; resolve it. Take a screenshot of the conflict details and submit that with your repo.

Make sure you merge everything to master and submit the link.

Assignment Requirements:

Use what we've covered so far (Terminal, Git and Github) to create a simple 1-page HTML application. A few paragraphs of text for each point of view and at least one image for each is required.

One team member must create a repository on Github **with a Readme**. Add your partner as a collaborator. Put the appropriate information in the readme file (this will be basic, because it's a simple 1-off).

Each team member will create a branch and add their argument / position and image(s) to the app. Merge everything to the master branch when you're finished. **Do code reviews before you merge!**

Push the finished files to your repo, double check to make sure you've merged everything to the master branch and submit the repo URL to the FOL dropbox.

Submission:

Homework must be submitted by the end of class in **Week 6**. Use the points below as a checklist:

- Github repo: master branch, and also a branch (or branches) for each team member
- Name the dev branches appropriately per member IE dev.tvr.cats, dev.jb.dogs
- Submit the repo URL via FOL dropbox - DO NOT submit working files
-

REQUIRED SUBMISSION FILES:

See the assignment requirements above - a repo link submitted to the FOL dropbox

DO NOT SUBMIT ANY DESIGN FILES to the dropbox - just the Github URL

Please follow correct folder and file structure as outlined in class

Additional Information:

Missed tests/exams will not be rescheduled without some valid evidence of some important event over which the student has no control (e.g., Court appearance, death in the family).

Missed tests or exams, therefore, can receive a zero. The students are advised to notify the professor prior to missing the test.

Students are expected to hand in all assignments to the course instructor on the due date, and all assignments must be submitted in the format specified by the instructor (e.g., on FOL, in printed form, on a specific lab computer, etc.); assignments will not be accepted in any format other than that specified.

Late assignments will not be accepted, nor will make up test or assignments be permitted, without some valid evidence of some important event over which the student has no control (e.g., documented illness, death in the family). Missed tests or assignments, therefore, will receive a mark of zero. Late assignments and make-up tests will only be permitted following the submission of adequate documentation acceptable to the instructor (e.g., a doctor's note). Students are advised to notify the instructor prior to missing an assignment due date or a scheduled test.

Immediately upon return from an illness/absence in which a test or assignment has been missed, the student is responsible for contacting the course instructor to discuss the problem. The instructor will make arrangements for any student deemed eligible. The alternative test/assignment will be of equal value to the one missed with no grade penalty. The timeline and due dates will be determined by the course instructor.

At mid-term, any unsatisfactory results will be reported to the student.

This course may be revised by the professor with suitable notification to the students. Students are responsible for making arrangements to pick up missed handouts, assignments and course announcements from classmates.

Plagiarism (e.g., failure to acknowledge sources used, submitting another student's work under your name, or producing work for another student to submit) is a serious academic offense that shall result in appropriate penalties, to be determined at the discretion of the course professor in consultation with the chairperson of the Communication Arts division. The penalties shall range from failure of an assignment to possible failure of the course. Students shall not make the assumption that any provision will be made by the professor to permit the student to rewrite or redo failed assignments.
